PRICE ONE CENT.

NEW YORK, WEDNESDAY, APRIL 8, 1891.

O'CLOCK.

Lack of Ventilation,

Husted Bill Tinkering Delays Tunnel Legislation at Albany.

hole of Calcutta !"

It was the resonant voice of Mr. Chaupeer M. Depew, and he clambered into the front scat in the glass sided box, or observatory, built over the great built-jacket of the Moni-tor, the track inspecting ingine of the New rectors of the New York, New Haven and York Central Raitroad

trusty hand on the throttie, and a dozen re- ing, instead of to-day, as announced. porters soon filled the scars in the "observation car," Mr. Dejew and Vice-President by counsel when the directors are called Webb doing the bonors.

Depew to come up and inspect the Fourth by Judge Barrett, in Oyer and Terminer, is Avenue Tunnel, and observe the efforts that are being made by the New York Central to while John M. Bowers, attorney for the direclight the long subway.

THE EVENING WORLD was represented on lings, even the pleasing to the indictments, his excursion by the same reporter who felt. Mr. Bowers thinks that if the directors plead this excursion by the same reporter who felt spent three hours in its dark recesses, a month | Over and Terminer.

On that occasion the reporter satisfied him self that the tunnel was neither light nor safe, for it was impossible to see the signal lights wenty feet away, and three hundred feet at least is required by an engineer to bring a long passenger train to a safe stop, and in the Fouris Avenue Tunnel on such a foggy day the en danger warning on a fallible mechanical device for ringing a weak-volced gong beside the

Mr. Depew's invitation was sent out vester day morning for a trip in the afternoon. it was a perfect day, atmospherically. It

was not such a heavy, muggy, fogey day as from further consideration of the bill. that on which THE EVENING WORLD reporter train because the danger signal was invisible in the fog and smoke, causing the death of six human beings.

It was a clear and beautiful day. The su shone through a clear atmosphere, and the smoke and steam of the engines in the tunnel arose through the openings in the tunnel roof and were dissipated in the clear air outside. THIRTY MILES AN HOUR UNDER GROUND.

The trip of the Monitor was up through the calls his " Patti " voice to his guesta:

target signal beside the track on Forey-sixth plead.

tinued, as the Monitor passed Fifty-third street, still in the open.

hole ! There, see the 'safety' signal a quarter | ject in their bill. signal further than a red light, and our expert another meeting on Thursday, and Senator till it's too late.

"There's another signal. Now we're apty-candle-power incandescent lights 120 feet A. P. apart on each side of the track from Eighty-

"There, see now. The engineer is slowing up. He can's distinguish between the signal lights and the others. Ah! here's the signal, of the Hallroad Company as counsel, but Mr. No, that wasn't it. This is-No, we must

bave passed it." The Monitor was in the open air above the lar champion of the bill. tunnel, having whisked through the long bore

"You see, we don't care a snap for expense. What we want is the safest tunnel in the world. We think we've got it, but some people asy we haven't. We'l, if we haven't, then we will have it if money can buy it. But you see for yourselves that these lights don't help it any."

"In the Hoosac Tunnel a perfectly even and pleasant illumination of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained, without any glare at all, by the use of the subway is obtained.

"Nothing was done by the Company despite incandescent lights of about 40 per cent, the incandescent lights of about 40 per cent at there are three of them in the same the death of six human beings had to be space that one of yours is expected to light, so that they gain one-fitth in the amount of light, but distribute it so that they have only two-fitts but distribute itso that they now the giare to centend with. Don't you toink the first property in the premark of the tunnel would produce much better of the tunnel would produce much better results that your work part of the series indictments." Continued the Assembly—in any the Company despite these indictments. "Continued the Assembly—in any the tropical that in February instructions in any the results when the care three indictments." Continued the Assembly—in any the february instruction of the continuents. "Continued the Assembly—in any the february instruction of the continuents." Continued the Assembly—in any the february instruction of the continuents. "Continued the Assembly—in any the february instruction of the continuents." Continuents. "Continuents." Con

again declared that no lights would be of certain value in a fog when the smoke and steam nugged the ground.

'That's the idea, exactly. The Eventon Worked has arged the ventulation of the tunnel as a condition precedent to its adequate lightas a condition precedent to its adequate light
"It's a just, fair and reasonable measure, and I sak a favorable report on it by this committee."

HALF LIGHTH.

Ing and absolute safety."

How dependent to its adequate lighting and absolute safety."

How dependent to its adequate lighting and last a favorable report on it by this committee."

Ex-Congressina Camp objected to a favorable report and the whole tenor of this argument was to the effect that the whole tenor of this argument was to the effect that the whole tenor of this trained, it commissioners, as the possibility of ventilating or lighting the timed by experiments conducted under the company. And that's what we'd like to do; which proves that we don't care for the expense, for it would be an exceedingly expersive job, as the roof is sevenly feet there in places. It is an interest and solid rock at that."

The Monitor had been turned around at Mott lisven, and then the return trip was made through the middle tunnel, where Mr. Depew again ingeneously called attention to the lighted way before the engine, saying enthrolland.

The Few Lamps Obscured from Lack of Ventilation.

The Few Lamps Obscured from Lack of Ventilation.

The John the Lack of Ventilation.

adoption of any order excellent of lighting or sinsalically:

"It's the lightest tunnel in the world."

But it was the light of a ciear day. The light of heaven, save from Ninciy-third to Eggity-sixth streets, and from Seventy-second to Sixty-Seventh streets, and here it was quite dark. Dark enough, even in this clear day, to make "Dr." Sawyer slacken speed and go carefully.

adoption of any order excelent of lighting or within the consideration which was rise."

In executive session Mr. Brrne, who is a member of the Committee, moved to report his bill layorably, but he was shat out two are distingted to Connot to adjourn, which was detained a topic by Chairman Bush without taking a vote.

It is possible that either Mr. Byrne or Mr. Sulker may move at to-day's session to disting the committee from further consideration of their bill.

Mr. Salls r tried in committee from the committee to get the Mr. Salls r tried in committee to get carefully.

The trip through the tunnel was a most Mr. Camp to consent that both tills be reported to the Bouse for action, but the will relieve we will take a plunge into the dark. Heating a restimant of the Central looks to an are ready, we will take a plunge into the dark lighting experiment of the Central tooks to an observer like a design d effort to prove that the tunnel can't be lighted.

THEY WILL PLEAD TO-MORKOW.
Clerk Unger, of District-Attorney Nicoll's Hartford Rattroad Company would plead in Tipaters' Opinions on the Various . Dr." Nat Sawyer atood in the cab, his Part I. of General Spacions to-morrow morn-

lights from the illuminating lights, while the that he thought favorably of the proposed giare will render it difficult to see the red lights amendment, and he may possibly move it at that time. Of the Committee of the Assembly there proaching the rock out, where we have not in were present at resterday's meeting Chairman

Bush and Merers. Holcomb, Byrne, Mase, Chamberlain, Johnson, Sawmiller and

Ex-Senator Hamilton Harris and ex-Congressman Camp were present in the interest Camp did all the talking.

Assemblyman Suizer appeared as the particu-He announce! that Mr. Byrne and he had

in about six minutes. There was a beutific smile on the genial face of the agreeable President of the big railroad corporation.

IS IT THE SAFEST TUNNEL IN THE WORLD?

"You see, we don't care a snap for expense."

"You see, we don't care a snap for expense."

of the tunnel would produce much better results than your present experiment: Seems to me it doesn't require the knowledge of all expert to understand that 40-candle lights would give a blinding glare."

It was the suggestion of the timid Evening wash. It also provides another safe guard by giving to certain local authorities the power to approve of all plans for exterior constitution, so that the risks of the municipality and there's anything in it we'll discover it. We shall try marked to power lights in a day or best illum nate and best ventilate the tinnet.

shall try Ex-candle power lights in a day or two, and so on, but no lights are going to plerce fog, you know."

"You have explained to us inexpert reporters that naturally white lights penetrate fourther than red lights. Now red lights are four danker lights in this tunnel in forgy times, as well as on clear days and nights. As this contrasing of signal lights with the piners, I notice that they are all about on a sibility for all accidents from the Company onto the largestator contained in the measure."

"It refmits the railross to adopt what will large then line measure and them means desirable the times. "When the Company, the Railrosa Company in day one to a spread and the means desirable that in the lights are four danker lights in this tunnel in forgy times, as well as on clear days and nights. As the instructions of the Legislature contained in the measure."

Mr. Salizer then took up the Husted bill and analyzed it, showing now it shifts the responsibility for all accidents from the Company onto

level. Wouldn't it help the engineer if the signal lights were elevated above its diumblaing lights were elevated above its diumblaing lights?" persisted the Evening World man.

Mr. Depew said "undoubtedly," and then again declared that no lights would be of certain value in a for when the smoke and steam.

The Railroad Commissioners; how it provides for delays in the courts which may continue for years, and the needed improvement still be things longed for.

He said that it had been remarked that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been introduced to improve the same that the Husted bull had simply been remarked that the Husted bull had simply been the same that the Husted bull had simply been remarked that the Husted bull

Mr. Sale r tried in ones Committee to get

POINTERS ON THE RACES.

Winners To-Day.

on the hill to-day. Six events are on the card as usual, and every one should be a horse race. The track will be dry and fast and n the fourth event, in which Meriden, Kenwood, Prince Howard, Knaftan and Glory are hill top record for six and one half furlongs were broken.

The first race is at six forlongs. Experience has been running so well in his past few races

Taylor came to San Francisco from Australia

His case puzzled the physicians, but an spector called in from the Board of Health Denuty Coroner Donin and several other p f I ane, made an autopsy yesterday, when

was a patient. The Morgue has also been closed to every-

The Morphe has also been closed to everybody except undertakers and straches, and
Keeper White's instructions prevent him from
allowing identifications.

Dr. Ridson visited the nospital inst night. He
is of opinion that Taylor must have landed
from some veases a day or two before he complained of illness, because it did not seem
it little that ne could have contracted the disease
in this city as it was not prevalent.

Dr. Waterman, who had charge of Taylor,
said that when the latter was brought in Thursday evening, his examination made him auspictous and he notified the Board of Health.

Dr. Dillingham, of the Health Department,
called at the nonthial the same evening, and on
examination declared that Taylor was not surfering from a contrigions disease.

The eruptive sores that appeared on the
man's body augmented Dr. Waterman's suspictous, which were confirmed yesterday by the
autoper.
